Part 1 Jay a Transactions Fundamentals

Chapter 1 Transactions Fundamentals 3
What Are Transactions and Why Do I Need Them? 4
  Atomicity 7
  Consistency 9
  Isolation (Serializability) 9
    Two-Phase Concurrency Control 10
    Optimistic Versus Pessimistic Concurrency Control 11
    Type-Specific Concurrency Control 12
    Deadlock Detection and Prevention 13
  Durability 14
  Services and Participants 14
Two-Phase Commit Optimizations 16
Synchronizations 19
Heuristic Transactions 21
The Transaction Log 24
Failure Recovery 26
Trust Implications 30
Types of Transactions 32
  Nested Transactions 32
  Independent Top-Level Transactions 34
  Concurrent Transactions 35
  Glued Transactions 36
Distributed Transactions 36
  The Transaction Context 37
  Interposition 38
Controlling a Transaction 40
Transactions and Threads 44
  Checked Transactions 44
  Suspending and Resuming Transactionality 47
Transactions and Queues 47
Transactions and Replication 50
  Maintaining Information on Persistent Objects 51
  Replication Protocols 52
  Integrating Replication and Transactions 54
  Availability Measures in Current Application Servers 56
Transaction Processing Monitors 58
Transactions and Workflow 58
Summary 61

Chapter 2  Foundation of Transactions in J2EE: The Java Transaction API 63
What Is the DTP? 64
Java Transaction API 68
  Application Level Transaction Management in Java 69
    UserTransaction Interface 69
    TransactionManager Interface 72
      Suspending and Resuming a Transaction 73
    Transaction Interface 75
      Transaction Status 76
      Resource Enlistment 77
    Transaction Synchronization 78
    JTA-DTP Discrepancies 79
Transaction Manager to Resource Manager Interfaces 80
Chapter 3  The Java Transaction Service 95
The OTS in a Nutshell 97
The Java Transaction Service 98
Relationship to Other Transaction Standards 98
The OTS Architecture 99
   Application Programming Models 100
   The Transaction Factory 102
   Managing Transaction Contexts 103
   Nested Transactions 106
   Transaction Propagation 107
      TransactionalObject Interface 108
      OTS Policy 108
   Examples 109
   Handling Heuristics 110
   Transaction Controls 111
      The Terminator 112
      The Coordinator 113
   Current 115
   Participating in an OTS Transaction 118
      Resource 118
      SubtransactionAwareResource 122
      Synchronization 124
      Participant Relationships 125
      Transactions and Registered Resources 126
Contents

The Recovery Coordinator 128
Interposition 130
Shared and Unshared Transactions 131
Checked Transaction Behavior 131
Transaction Interoperability 132
Writing Applications Using OTS Interfaces 133
Transaction Context Management 134
A Transaction Originator: Indirect Context Management and Implicit Propagation 134
Transaction Originator: Direct Context Management and Explicit Propagation 135
Implementing a Recoverable Server 135
Transactional Object 136
Resource Object 137
An Example of a Recoverable Server 137
Example of a Transactional Object 140
Worked Example 141
Resource 142
Transactional Implementation 143
Server Implementation 143
Client Implementation 145
Sequence Diagram 146
Choosing an OTS Implementation 147
Summary 149

Part 2 Transactions in J2EE

Chapter 4 JDBC and Transactions 153
The Basic JDBC Model 154
java.sql.Connection 154
Types of JDBC Drivers 159
Transaction Isolation Levels 160
Implications of Relaxed Isolation 161
Dirty Reads 161
Non-repeatable Reads 162
Phantom Reads 162
Isolation Constraints 162
TRANSACTION_NONE 163
TRANSACTION_READ_UNCOMMITTED 163
TRANSACTION_READ_COMMITTED 163
TRANSACTION_REPEATABLE_READ 164
TRANSACTION_SERIALIZABLE 164
Local Transactions 164
JDBC 2.0 Advanced Features 166
   Batch Updates 166
   Updateable Result Sets 167
Distributed Transactions 167
   XADataSource and XAConnection Interfaces 169
   XAResource Interface 170
   Connection Management 173
Summary 183

Chapter 5  JMS and Transactions 185
What Is Message-Oriented Middleware? 185
Java Message Service 188
Message Acknowledgement 190
   AUTO<_ACKNOWLEDGE Mode 190
   DUPS_OK_ACKNOWLEDGE Mode 191
   CLIENT_ACKNOWLEDGE Mode 191
JMS Local Transactions 192
   JMS 1.1 Improvements 195
Global Transactions 195
   XAConnectionFactory 196
   XAConnection 197
   XASession 197
Application Server Integration 199
Example Application 202
Summary 205

Chapter 6  Enterprise JavaBeans and Transactions 207
What Are EJBs? 207
Transaction Support 210
   Container-Managed Transactions 211
   Specifying Container-Managed Transactions 214
   Bean-Managed Transactions 215
   BMTvs. CMT 217
   Error Handling 217
   Bean Types and Transactions 221
   Optimistic Locking 224
   Pessimistic Locking 225
   Commit Options 226
Chapter 7  J2EE Connector Architecture and Transactions 237

Enterprise Application Integration 238
Integration Servers 238
Web Services 239

Inside J2C 239

CCI240
javax.resource.cci.Connection 240
javax.resource.cci.ConnectionFactory241
javax.resource.cci.Record 241
javax.resource.cci.Interaction241
javax.resource.cci.InteractionSpec 242
CCI Example 242

SPI243
javax.resource.spi.ManagedConnection 244
javax.resource.spi.ManagedConnectionFactory 244

Connection Management 245
Transaction Management 247
NoTransaction 247
Local Transactions 247
SPI LocalTransaction Interface 247
CCI LocalTransaction Interface 248
Sample Scenario 250
Distributed Transactions 251

J2C Futures 253
Summary 255

Part 3  The Future of Transactions in J2EE and Web Services

Chapter 8  Advanced Transaction Concepts 259

Is Java Suitable for High Performance Transaction Systems? 259
Compiled versus Interpreted 260
Appendix A  Resources 361
Transactional J2EE/J2SE Specifications 361
Java 2 Platform, Enterprise Edition (J2EE) Specification 1.4 361
The Java Transaction API (JTA) Specification 1.0.IB 361
The Java Transaction Service (JTS) Specification 1.0 361
The JDBC Specifications, 3.0, 2.1, and Optional Package API 2.0 362
Java Message Service (JMS) Specification 1.1 362
Enterprise JavaBeans (EJB) Specification 2.1 362
J2EE Connector (JCA) Specification 1.5 362
Java API for XML Transactions 362
J2EE Activity Service for Extended Transactions 362
Transactional Web Services Specifications 363
Web Services Composite Application Framework (WS-CAF) 1.0 363
Web Services Transaction (WS-Transaction) 363
Web Services Coordination (WS-Coordination) 363
Web Services Choreography (WS-C) 363
Business Process Execution Language for Web Services Version 1.1 364
BTP Committee Specification 364
Other Transaction-Related Specifications 364
Object Transaction Service (OTS) Specification 1.3 364
Additional Structuring Mechanisms for the OTS, version 1.0 364
Distributed TP: The XA Specification 364
Distributed TP: The TX (Transaction Demarcation) Specification 364
Distributed TP: Reference Model, Version 3 364
Books 365
Articles 365

Appendix B  Experiences Gained and Lessons Learned 367
Commercial Implementations versus Open-Source 367
Questions to Consider 368
Development Background 368
Performance 368
Fault Tolerance 369
Two-Phase Commit 369
Reliability Characteristics 369
Support for Nested Transactions 370
Support for Arbitrary Participants 370
Quality Assurance 370
Distributed Transactions 370
