### Chapter One - It's not just cash; accounts matter

1. Introduction - Valuation refresher                                    | 1    |
2. Distributions, returns and growth                                     | 3    |
3. Cash, accruals and profits                                             | 13   |
4. The Economic Profit model                                             | 15   |
5. The real world of specific forecasts                                  | 17   |
6. Introducing debt                                                     | 18   |

### Chapter Two - WACC - Forty years on

1. Risk and Return                                                       | 21   |
2. Diversification and portfolio effects                                 | 21   |
3. The problem of growth                                                | 24   |
4. Leverage and the cost of equity                                      | 34   |
5. Building in tax shelters                                             | 37   |
6. Time varying WACC                                                    | 40   |
7. The walking wounded - real options and capital arbitrage             | 54   |
8. International markets and foreign exchange rates                     | 55   |
9. Conclusions on discount rates                                        | 68   |

### Chapter Three - What do we mean by 'return'?

1. IRR versus NPV                                                       | 71   |
2. Calculating CFROI                                                    | 72   |
3. Another approach: CROCI                                              | 76   |
4. Uses and abuses of ROCE                                              | 85   |

### Chapter Four - Key issues in accounting and their treatment under IFRS

1. Revenue recognition and measurement                                  | 87   |
2. Stock options                                                        | 89   |
3. Taxation
4. Accounting for pension obligations
5. Provisions
6. Leasing
7. Derivatives
8. Fixed assets
9. Foreign exchange

Chapter Five - Valuing a company
1. Building a forecast
2. Ratios and scenarios
3. Building a valuation
4. Frequent problems
5. Conclusions regarding basic industrials

Chapter Six - The awkward squad
1. Utilities
2. Resource extraction companies
3. Banks
4. Insurance companies

Chapter Seven - An introduction to consolidation
1. Introduction
2. Treatment of Investments
3. Methods of consolidation
4. Further issues in consolidation
5. Accounting for associates and joint ventures
6. Purchase accounting and uniting of interests
7. Foreign subsidiaries
8. Accounting for disposals
9. Modelling mergers and acquisitions

Chapter Eight - Conclusions and continuations
1. Conclusions
2. Continuations
