Contents

About the Author.	xv
About the Technical Reviewer.	xvii
Acknowledgments.	xix
Introduction.	xxi

•CHAPTER 1 Coupling. 1

Coupling Is Inevitable.	2
The Coupling Symbol.	4
Is Coupling Bad?.	5
The Nature of Coupling.	5
Static Coupling.	6
Dynamic Coupling.	7
Static vs. Dynamic Coupling.	9
Coupling Flavors.	9
Logic Coupling.	10
Type Coupling.	18
Signature Coupling.	25
Coupling Space.	31
Coupling Charts.	33
Coupling Diagrams.	35
Coupling Diagrams As Guides for System Changes.	36
Coupling Transforms.	38
Logic-Coupling Transforms.	38
Type-Coupling Transforms.	46
Common Coupling Scenarios.	52
Coupling with User-Defined Types.	64
Coupling Due to Interfaces.	65
Coupling Due to Method Parameters.	67
Summary.	69

CHAPTER 2 Events and Notifications 71

Defining Events and Notifications.	71
A Brief History of Events.	74
Nomenclature and Semantics.	77
Event Subscription.	78
The Subscription Process.	79

Subscription Models	80
Channels	81
Types	83
Filters	83
Groups	87
Subscription Policies	89
Summary	89
CHAPTER 3 Notification Delivery	91
Delivery Protocols	91
Delivery Using Shared Resources	93
Shared Files	94
Shared Memory	95
Semaphores	99
Serialized Connections	102
Delivery Using Procedure Calls	103
Local Procedure Calls	105
Remote Procedure Calls	105
Notification Architectures	106
Direct Delivery	106
Indirect Delivery	108
Delivery Synchrony	113
Synchronous Delivery	114
Asynchronous Delivery	114
Delivery Fanout	115
Quality of Service	117
Reliability	117
Priority	118
Timing	118
Throughput	118
Order	119
Transactions	119
Delivery Order	121
Causal Order	121
Partial Order	123
Total Order	128
Summary	129
CHAPTER 4 Notification Payloads	131
The Delivery Mechanism As a Constraint	131
Payload Size vs. Notification Frequency	132
Notifications Sent Using Shared Resources	132

CHAPTER 7	Signal Wiring Diagrams.....	217
	Software ICs.....	217
	Objects.....	218
	Signals.....	220
	PC Signals.....	220
	SR Signals.....	221
	Pins.....	223
	Naming Pins.....	223
	Input Pins.....	224
	Output Pins.....	226
	Wiring Pins Together.....	228
	Numbering Pins.....	228
	Pin-Legend Tables.....	229
	One-to-Many Connections.....	230
	Many-to-One Connections.....	230
	Statically Bound Signals.....	231
	Components.....	234
	Buses.....	235
	Showing One-to-Many Connections.....	237
	Showing Many-to-One Connections.....	238
	Depicting Distributed Systems.....	239
	Switches.....	240
	Switch Controllers.....	241
	Showing Switching Information.....	244
	Switching at the Interface Level.....	245
	Pages.....	246
	Labeling Pages.....	246
	Multipage Signals.....	247
	Levels of Detail.....	249
	Labeling Items in Multipage Diagrams.....	251
	Signal Timing.....	251
	Considerations on Wiring Diagrams.....	251
	Summary.....	252
•CHAPTER 8	The Mechanics of Event Firing.....	253
	Checking to See if Subscribers Exist.....	254
	What to Do When No Subscribers Are Available.....	254
	Packaging the Notification Payload.....	255
	Protecting the Subscriber List.....	255
	Sending the Event Notification.....	256
	Using Messages.....	256
	Using Procedure Calls.....	264
	Using a Shared Resource.....	276

Reaching All Subscribers 295
 Unicast Notifications 296
 Multicast Notifications 296
 The Fire Method 299
 Naming Conventions 299
 Using Procedure Calls 301
 Using Messages 306
 Asynchronous Firing 306
 Optimization 307
 Summary 309

CHAPTER 9 Event-Based Interaction Patterns 311

A Natural Language Perspective 312
 The Push-Pull Model 313
 Push Interactions 313
 Pull Interactions 315
 Blind Interactions 317
 Synchronous Blind Interactions 318
 Asynchronous Blind Interactions 319
 Transparent Interactions 323
 Pushed Feedback 324
 Polled Feedback 325
 Interruptible Interactions 327
 Interruptible Blind Interactions 328
 Interruptible Transparent Interactions 329
 Handshaking 331
 Summary 332

CHAPTER 10 Functional Roles 333

Workers 334
 What Workers Should Do 334
 Composite Workers 335
 What Workers Shouldn't Do 336
 How Complex Should a Worker Be? 337
 Worker Examples 338
 Coordinators 359
 What Is a Coordinator? 359
 Coordinator Teams 360
 Key Coordination Tasks 361
 Builders 386
 Smart Builders 388
 Background Builders 389
 JIT Builders 394

Binders.	398
Late Binding.	401
Smart Binders.	416
JIT Binders.	417
Dynamic Binding.	428
Routers.	433
Routers in Layered Architectures.	433
Routers As Notification Forwarders.	434
Routers As Bridges.	435
An Example: Interconnecting Coordinators.	435
Summary.	442
•CHAPTER 11 Case Study 1: A System Browser.	443
System Requirements.	443
System Design.	446
Life-Cycle Management.	450
Builder.	460
Binder.	463
The Menu and Toolbar.	466
Persistent User Settings.	472
The Folders Navigator.	475
The Search Navigator.	483
Use Cases.	493
Testing the System.	495
The NavigatorFolders Test Fixture.	495
The ContentFileList Test Fixture.	499
The NavigatorSearch Test Fixture.	502
Summary.	506
CHAPTER 12 Case Study 2: A Pipelined HTTP Service	507
System Requirements.	508
System Design.	510
Managing the Connection Pool.	514
The Connection Team.	518
Testing the System.	543
Summary.	566

CHAPTER 13	Case Study 3: A Distributed Workflow System	567
	Functional Requirements	567
	Project Configuration	569
	The Client Component	570
	C#Code	575
	VB .NET Code	586
	The Server Components	596
	The Order Processor Component	597
	C#Code	599
	VB .NET Code	605
	The Parts Scheduling Component	611
	The Vehicle Assembly Component	625
	The Invoicing Component	629
	Common Types Used in the System	634
	C#Code	636
	VB .NET Code	637
	Testing the Complete System	640
	Summary	641
APPENDIX A	Glossary	643
APPENDIX B	References	647
INDEX	655
