UNIVERSITY PRESS

Contents

Abbreviations	xx
1 What is planning, and why plan?	1
Development of formalized planning	1
Health planning	2
Rationale for health planning	2
What is allocative planning?	3
Scarcity and choice — the basis for planning	3
What is meant by the term 'health'?	7
Different perspectives on health and health-care	8
The market as a means of determining allocations	9
The state's responsibilities in the health sector	11
State attitudes to different types of health-care	14
Attitudes to health planning	15
Planning as an open transparent process	18
Planning as a technocratic or as a political activity	18
Summary	19
Introductory reading	20
Exercise 1	20
References and further reading	20
2 Approaches to planning	24
Planning models	24
Realistic rational planning	31
Planning as a political process	33
Private and public sector planning	34
Levels of planning	36
Planning, management, and policy	37
Planning activities and terms	37
Summary	40
Introductory reading	40
Exercise 2	40
References and further reading	41

3	The policy context: Primary Health Care and Health Sector Reform	43
	Origins of Primary Health Care	43
	The Alma-Ata declaration	49
	Equity	50
	Community participation	55
	A multisectoral approach to health	57
	Appropriate technology and service mix	58
	A health-promotive and preventive approach	59
	Decentralization	59
	Multiagency collaboration	61
	Obstacles to the implementation of a PHC approach	61
	Health sector reform	63
	HSR, PHC, and planning	66
	Summary	68
	Introductory reading	68
	Exercise 3	69
	References and further reading	69
4	Planning for health	74
	Planning for the health-care sector	75
	Development of government policies and plans towards non-State organizations	81
	Planning for health promotion	88
	Planning for health	91
	Summary	93
	Introductory reading	93
	Exercise 4	93
	References and further reading	94
5	Financing health-care	95
	The context	95
	Alternative strategies to increase effective resource levels	98
	Criteria for choosing a financing system	100
	Alternative approaches to financing health-care	103
	Planning and financing	110
	Summary	111
	Introductory reading	111
	Exercise 5	113
	References and further reading	113
6	Information for planning	116
	What is information and why do we need it?	116
	Paralysis by analysis	118

Accuracy of information	118
Spatial and time considerations	121
Level of aggregation of information	122
Type of information	123
Information systems	127
Summary	133
Introductory reading	133
Exercise 6	134
References and further reading	134
Situational analysis	137
Population characteristics	138
Area characteristics and infrastructure	139
Policy and political environment	141
Health needs	141
The non-health sector: plans and services provided	143
Health services	143
Resources	144
Efficiency, effectiveness, equity, and quality of current services	147
Analysis of the situation	147
Who should carry out the situational analysis?	148
Summary	149
Introductory reading	149
Exercise 7	149
References and further reading	149
Setting priorities	151
Health and need	151
Need as perceived by the community and by the health professions	153
Underlying perceptions of health	- 154
Who should set priorities?	159
Establishing priorities within a planning framework	161
Priority-setting and PHC	165
Summary	166
Introductory reading	167
Exercise 8	167
References and further reading	168
Costs and costing	170
What is meant by costs?	170
Whose costs?	171
Real or market prices?	• 174
Costing methods	176

Levels of accuracy and sources of information	180
Unit costs	181
Recurrent cost coefficients	182
Costs relationships	182
Apportionment of joint costs	184
Cash-flow analysis	186
Summary	187
Introductory reading	187
Exercise 9: Marginal and average cost example	187
References and further reading	188
10 Option appraisal and evaluation	190
Economic appraisal techniques	191
Option appraisal and economic appraisal	203
Forms and checklists	206
Option appraisal and programming	206
Appraisal and evaluation	207
Evaluation	207
Evaluation questions	208
Evaluations and situational analysis	211
Summary	211
Introductory reading	212
Exercise 10	212
References and further reading	213
11 Resource allocation and budgeting	215
Different forms of budget	215
Budgeting and resource allocation approaches	219
The budgeting process	226
Financial management and accounting	229
Summary	234
Introductory reading	235
Exercise 11	235
References and further reading	235
12 Programmes, projects, implementation, and monitoring	237
Programmes and projects	237
Implementation	239
Causes of poor implementation	240
Improving the record on implementation	243
Monitoring	255
Location of projects and programmes	256
Implementation of services provided by other agencies	257
Summary	257

Introductory reading	257
Exercise 12	258
References and further reading	258
13 Planning human resources	260
What is human resource planning?	260
The record on human resource planning	261
Why is the record on human resource planning so poor?	262
Human resource planning — an approach	263
Assess demand	265
Assess supply	268
Determine mismatches between the estimated demand and supply over time and location	273
Determine appropriate action to minimize mismatches	273
Regularly review and update plan	274
Human resource planning implementation	274
Relationship to the planning process	275
Human resource planning and Health Sector Reform	276
Summary	277
Introductory reading	277
Exercise 13	278
References and further reading	279
14 The state of planning and planning for the State	280
Assessment criteria	281
An illustrative case study of a planning system	293
A planning culture	300
The future of State planning	301
Introductory reading	302
Exercise 14	302
References and further reading	302
Index	305
