

Growth & Development

With Special Reference
to Developing Economies

A. P. Thirlwall

*Professor of Applied Economics
University of Kent*

Eighth Edition

palgrave
macmillan

Brief contents

PART I	Development and underdevelopment		
1	The study of economic development	3	
2	The development gap and the measurement of poverty	23	
3	The characteristics of underdevelopment and structural change	65	
4	Theories of economic growth: why growth rates differ between countries	122	
	PART II	Factors in the development process	165
5	Land, labour and agriculture	167	
6	Capital and technical progress	210	
	PART III	Obstacles to development	231
7	Dualism, centre-periphery models and the process of cumulative causation	233	
8	Population and development	257	
	PART IV	The role of the state, the allocation of resources, sustainable development and the choice of techniques	285
9	Resource allocation in developing countries: the market mechanism and the role of the state	287	
10	Project appraisal, social cost-benefit analysis and shadow wages	316	
11	Development and the environment	338	
12	The choice of techniques	365	
13	Input-output analysis	383	
	PART V	Financing economic development	401
14	Financing development from domestic resources	401	
15	Foreign assistance, debt and development	455	
	PART VI	International trade, the balance of payments and development	511
16	Trade and development	513	
17	The balance of payments, international monetary assistance and development	572

PART I

Development and underdevelopment

1 The study of economic development	3
Development economics as a subject	3
Academic interest in development	4
The new international economic order	10
Millennium Development Goals	11
Globalization and interdependence of the world economy	12
The meaning of development and the challenge of development economics	17
The perpetuation of underdevelopment	19
Discussion questions	21
Websites	21
2 The development gap and the measurement of poverty	23
The development gap and income distribution in the world economy	23
The measurement and comparability of per capita income	30
Purchasing power parity (PPP)	32
Per capita income as an index of development	34
Measuring poverty	36
Meeting the Millennium Poverty Reduction Target	40
Tackling poverty from the 'grass roots'	41
Human Poverty Index and Human Development Index	47
Can the poor countries ever catch up?	54
Discussion questions	63
Notes	64
Websites on poverty and income distribution	64

3	The characteristics of underdevelopment and structural change	65
	The characteristics of underdevelopment	66
	The dominance of agriculture and petty services	66
	Low level of capital accumulation	68
	Rapid population growth	69
	Exports dominated by primary commodities	71
	The curse of natural resources	73
	Weak institutional structures	74
	Other dimensions of the development gap	77
	Unemployment	77
	Education	80
	Inequality, vertical and horizontal	84
	Growth and distribution	90
	Poverty-weighted growth rates	91
	Nutrition and health	92
	Poverty, famine and entitlements	97
	Food production	102
	Basic needs	104
	Stages of development and structural change	105
	Rostow's stages of growth	107
	Industrialization and growth	114
	Kaldor's growth laws	117
	Discussion questions	120
	Notes	121
	Websites on health, nutrition, famine, education, structural change and income distribution	121
4	Theories of economic growth: why growth rates differ between countries	122
	Classical growth theory	123
	The Harrod-Domar growth model	130
	Neoclassical growth theory	136
	The production-function approach to the analysis of growth	140
	Production function studies of developing countries	149
	'New' (endogenous) growth theory and the macrodeterminants of growth	153
	Discussion questions	162
	Notes	163
	Websites on growth theory	164
 PART II		
	Factors in the development process	165
5	Land, labour and agriculture	167
	Land	168
	The role of agriculture in development	169
	Barriers to agricultural development	171
	The organization of agriculture and land reform	177
	The supply response of agriculture	178
	Transforming traditional agriculture	180
	The growth of the money economy	183

Finance for traditional agriculture	185
The interdependence of agriculture and industry	187
Economic development with unlimited supplies of labour	188
A model of the complementarity between agriculture and industry	193
Rural-urban migration and urban unemployment	195
Disguised unemployment: types and measurement	198
Incentives and the costs of labour transfer	206
Discussion questions	208
Notes	208
Websites on agriculture	209

6 Capital and technical progress 210

The role of capital in development	210
The capital-output ratio	212
Technical progress	216
Capital- and labour-saving technical progress	216
How societies progress technologically	219
Learning	221
Investment in human capital: education	222
Women's education	226
Infrastructure investment	227
Technology and the developing countries	228
Discussion questions	229
Notes	229
Websites on technology and investment	229

PART III

Obstacles to development 231

7 Dualism, centre-periphery models and the process of cumulative causation 233

Dualism	234
The process of cumulative causation	236
Regional inequalities	239
International inequality and centre-periphery models	242
Models of 'regional' growth rate differences: Prebisch, Seers and Kaldor	244
The Prebisch model	244
The Seers model	245
An export growth model of regional growth rate differences	246
The new economic geography	250
Theories of dependence and unequal exchange	252
Unequal exchange	254
Discussion questions	255
Notes	256

8 Population and development 257

Introduction	257
Facts about world population	259
The determinants of fertility	263
The costs and benefits of population growth	268

Simon's challenge	272
The 'optimum' population	274
A model of the low-level equilibrium trap	276
The critical minimum effort thesis	281
Discussion questions	282
Notes	283
Websites on population	283
PART IV	
The role of the state, the allocation of resources, sustainable development and the choice of techniques	285
9 Resource allocation in developing countries: the market mechanism and the role of the state	287
The market mechanism and market failures	288
The role of the state	290
Corruption	294
Development plans	297
Policy models	299
Projection models	301
The allocation of resources: the broad policy choices	301
Industry versus agriculture	303
The comparative cost doctrine	303
Present versus future consumption	304
Choice of techniques	306
Balanced versus unbalanced growth	307
Unbalanced growth	309
Investment criteria	313
Discussion questions	315
Notes	315
Websites on government and corruption	315
10 Project appraisal, social cost-benefit analysis and shadow wages	316
Project appraisal	317
Financial appraisal	318
Economic appraisal	319
Divergences between market prices and social values	320
Economic prices for goods	321
Non-traded goods and conversion factors	322
Traded goods	324
Shadow prices for factors of production	325
The social rate of discount	325
The social cost of investment	326
The shadow wage rate	326
A closer examination of the change in consumption in industry and agriculture	328
The valuation of production foregone and the increase in consumption	329
A numerical calculation of the shadow wage	330
Social appraisal	330
The equivalence of the Little-Mirrlees formulation of the shadow wage and the UNIDO approach	333

Is it worth valuing all goods at world prices?	334
The application of the Little-Mirrlees and UNIDO approaches to project appraisal	334
Discussion questions	337
Notes	337
Websites on project appraisal	337
11 Development and the environment	338
Introduction	339
A model of the environment and economic activity	340
The market-based approach to environmental analysis	341
Externalities	342
Common property rights	346
The discount rate	346
The harvesting of renewable resources	347
Non-renewable resources	349
Other environmental values	351
Measuring environmental values	352
National income accounting	354
Risk and uncertainty	355
Economic growth and the environment	356
Sustainable development	357
Natural capital, equity and environmental values	358
Economic thought and the environment	361
International agencies and the environment	362
Discussion questions	363
Notes	364
Websites on the environment	364
12 The choice of techniques	365
The capital intensity of techniques in developing countries	365
The conflict between employment and output and employment and saving in the choice of techniques	369
Employment versus output	369
Aggregative implications of factor substitution	371
Employment versus saving	373
Wages and the capital intensity of production	375
Different classes' propensity to consume	376
Support of the unemployed	377
Are consumption and investment distinct?	378
Taxes and subsidies	379
Conclusion	380
Discussion questions	381
Notes	382
Websites on choice of techniques	382
13 Input-output analysis	383
The uses of input-output analysis	384
The input-output table	385
Input coefficients	386
A digression on matrix inversion	388

The general solution to the input-output model	390
Forecasting import requirements	394
Forecasting labour requirements	395
Forecasting investment requirements	396
Backward and forward linkages	397
Triangularized input-output tables	397
The assumptions of input-output analysis	398
Discussion questions	399
Notes	400

PART V

Financing economic development 401

14 Financing development from domestic resources 403

Introduction	404
Forms of saving	404
The prior-savings approach	410
The capacity to save	410
The willingness to save	413
Financial systems and economic development	415
The informal financial sector	416
Monetization and money market integration	417
Developing a banking system	419
Special development banks and micro-credit	421
Financial intermediaries	423
Financial liberalization	424
Critics of financial liberalization and empirical evidence	426
Fiscal policy and taxation	431
Tax reform in developing countries	436
Inflation, saving and growth	437
The Keynesian approach to the financing of development	438
Reconciling the prior-saving and forced-saving approaches to development	443
The quantity theory approach to the financing of development	444
Non-inflationary financing of investment	446
The dangers of inflation	447
Inflation and growth: the empirical evidence	448
The inflationary experience	450
The structuralist-monetarist debate in Latin America	452
Discussion questions	453
Notes	454
Websites on banking and finance	454

15 Foreign assistance, debt and development 455

Introduction	456
Dual-gap analysis and foreign borrowing	457
Models of capital imports and growth	461
Capital imports, domestic saving and the capital-output ratio	463
Types of international capital flows	464
The debate over international assistance to developing countries	465
The motives for official assistance	465

Assessing the impact of aid	467
The total net flow of financial resources to developing countries	471
Official development assistance (ODA)	472
Total net flow of financial resources from DAC countries	473
UK assistance to developing countries	473
The recipients of official assistance	476
Aid tying	478
Multilateral assistance	479
World Bank activities	479
Structural adjustment lending	482
Poverty Reduction Strategy Papers	484
Estimating the aid component of international assistance	484
The distribution of international assistance	488
Schemes for increasing the flow of revenue	489
Foreign direct investment and multinational corporations	491
International debt and debt-service problems	494
Optimal borrowing and sustainable debt	498
The debt crisis of the 1980s	499
Debt relief	502
The highly indebted poor country initiative (HIPC)	503
Debt rescheduling	506
Debt-service capping	507
Debt buybacks and debt swaps	507
Long-term solutions	508
Discussion questions	509
Notes	509
Websites on aid, debt and FDI	510

PART VI

International trade, the balance of payments and development	511
16 Trade and development	513
Introduction	514
The gains from trade	518
The static gains from trade	519
The dynamic gains from trade	521
Trade as a vent for surplus	522
Theory of customs unions and free trade areas	523
Empirical evidence on the growth effects of customs unions and trade liberalization	526
Trade liberalization and growth	528
Trade liberalization, exports and growth	531
Models of export-led growth	533
Trade, employment and poverty reduction	537
The disadvantages of free trade for development	542
Tariffs versus subsidies as a means of protection	544
Import substitution versus export promotion	547
Alternative approaches to trade in developing countries: the Prebisch doctrine	548

Technical progress and the terms of trade	548
The income elasticity of demand for products and the balance of payments	550
Recent trends in the terms of trade	552
Fair trade not free trade: trade policies towards developing countries	555
Effective protection	557
International commodity agreements	559
Buffer stock schemes	564
Restriction schemes	564
Price compensation schemes	565
Income compensation schemes	566
Producer cartels	567
Trade versus aid	568
Discussion questions	570
Notes	571
Websites on trade	571
17 The balance of payments, international monetary assistance and development	572
Balance-of-payments-constrained growth	573
The terms of trade	576
The exchange rate and devaluation	577
The IMF supply-side approach to devaluation	579
The growth of world income and structural change	580
Application of the balance-of-payments-constrained growth model	581
Capital flows	582
Exchange-rate systems for developing countries	585
The East Asian financial crisis: a cautionary tale	589
The international monetary system and developing countries	595
How the IMF works	597
Ordinary drawing rights	598
Extended Fund Facility (EFF)	599
Special facilities	600
Compensatory Financing Facility (CFF)	600
Emergency Assistance	600
Supplemental Reserve Facility (SRF)	600
Contingent Credit Line (CCL)	601
Poverty Reduction and Growth Facility (PRGF)	601
Criticisms of the IMF	603
The results of IMF programmes	605
Special Drawing Rights and the developing countries	607
Discussion questions	613
Notes	613
Websites on balance of payments and the IMF	613
