I Chapter 1: Android Fundamentals.....	1
What Is Android?.....	2
Installing the Android SDK.....	2
Java Development Kit (JDK).....	3
Android SDK and Target Platforms.....	3
Android SDK Test Drive.....	9
Android Architecture and Background.....	20
The Android Platform Stack.....	21
Android Component Architecture.....	23
The Android Runtime: Dalvik Virtual Machine (DVM).....	23
Using an Integrated Development Environment (IDE).....	27
Working with Eclipse.....	28
On the Web: Eclipse for Android Development.....	28
Quickstart: The Eclipse Android Development Tools (ADT) Plugin.....	29
Working with NetBeans.....	33
On the Web: NetBeans for Android Development.....	33
' Quickstart: The NetBeans Android (NBAndroid) Plugin.....	34
Working with IntelliJ IDEA Community Edition.....	42
On the Web: JetBrains IntelliJ IDEA for Android Development.....	42
Quickstart: The IntelliJ IDEA Android Plugin.....	43
Summary.....	47

Chapter 2: Development Tools in Practice.....	49
Coding with the SDK and a Programmer's Editor.....	50
Development Environment Dependencies.....	50
Ensure that Development Kit Locations Are on the Path.....	50
Preparing an Android Virtual Device (AVD).....	51
Frequently Used Android Development Kit Tools.....	52
Working with the Android Tools and a Code Editor.....	53
Selecting a Code Editor.....	53
Configuring the Editor for Android Work.....	56
The Example Application Project.....	58
Generating the Foundation Android Project.....	59
The Android Project Directory Structure.....	60
Preparing to Run the Example Application.....	61
Starting a Debugging Session.....	61
Replacing the Default Generated Code.....	63
Building and Installing the Project Example Code.....	64
Creating a Log Filter for the Application in the DDMS.....	64
Running the Example Application.....	66
What Does the Demo Application Do?.....	67
A Walk through the Core Application Files.....	74
Android Coding How to.....	81
Using the Android Log API.....	81
Centralizing Application GUI Initialization Code.....	85
Exiting an Application Activity.....	86
Enabling and Disabling Buttons (and other Views).....	87
Creating Controls Dynamically (at Runtime in Code).....	88
Making an Android Toast.....	90
Showing an Android Alert Dialog.....	90
Creating and Showing an Android System Notification.....	91
Using a Private Application File.....	92
Making Menus.....	95
Migrating the Example Application to Eclipse/ADT.....	97
Make a Copy of the Project.....	97
Open Eclipse with the ADT Plugin Installed.....	97
Create a New Android Project from the Copy of the Project.....	97
Create and Test a New Run Configuration for the Project.....	98
Deploying to a Real Device.....	99
Creating a Signed APK Package of the Example Application.....	101
Summary.....	104
Chapter 3: Roll Your Own Android Scripting Environment.....	105
Designing a Scripting Environment.....	106
The Components of a Scripting System.....	106
The Component Roles in a Scripting System.....	107
Designing for Resource-Constrained Systems.....	109
<i>j</i> Multi-Threading for Background Code.....	110
Programming with BASIC.....	110
A BASIC Backgrounder.....	111

Cocoa—A BASIC Interpreter for Java.....	111
Outlining the Code Projects for This Chapter.....	112
The Cocoa-BASIC AWT Project.....	112
Understanding the Cocoa-BASIC AWT Application Design.....	112
Running the Cocoa-BASIC AWT Desktop Application.....	114
Reviewing the Cocoa-BASIC AWT Source Code.....	118
The CocoaDroid Project.....	120
A Preflight Checklist.....	120
Understanding the CocoaDroid Application Design.....	121
Running the CocoaDroid Android Application.....	122
Summary.....	153
IB Chapter 4: Embedding Lua in Android Applications.....	155
Introducing Lua and Kahlua2.....	156
Lua Resources.....	156
Kahlua2 Resources.....	157
Using Kahlua2 in Your Android Java Applications.....	157
Development Environment Configuration.....	158
The Kahlua2 Project.....	158
Setting up the Kahlua2 Runtime Files Project.....	159
Building from the Console.....	160
Building from an IDE.....	160
The Kahlua2 Runtime Libraries.....	161
The Kahlua2 Android Interpreter Project.....	162
Setting up the Project.....	162
Building from the Console.....	163
Building from an IDE.....	163
Running the Kahlua2 Android Interpreter.....	164
Understanding the Basics of Embedding Kahlua2.....	165
The KahluaDroid Project.....	168
Running the KahluaDroid Application.....	169
Running Lua Code On or Off the Main GUI Thread.....	176
Exposing Android Application Methods to Kahlua2.....	180
Calling Application Methods as Lua Functions.....	183
Implementing an Application Startup Script.....	185
Summary.....	192
•Chapter 5: Introducing SL4A: The Scripting Layer for Android.....	193
What Is Scripting Layer for Android?.....	194
About SL4A.....	194
The SL4A License.....	194
Using SL4A.....	194
SL4A Resources.....	195
The SL4A Code Repository.....	195
Running SL4A in the Android Emulator.....	196
Development Environment Configuration.....	196
Downloading the SL4AAPKs.....	197
Installing the SL4AAPK on the Android Emulator.....	197
Running SL4A on the Android Emulator.....	198

Installing SL4A Interpreters.....	202
Understanding Scripting Layer for Android.....	209
Communicating Using JavaScript Object Notation (JSON).....	209
Summarizing the SL4A Architecture.....	210
Reviewing Local Proxy Implementations.....	211
Getting the SL4A Source Code.....	215
Cloning the SL4A Source Code.....	216
SL4A Hello World Examples.....	219
Summary.....	220
•Chapter 6: Creating a GUI with HTML/JavaScript and AIR.....	221
Setting Up an Android Project to Display a Web Application.....	222
The Android Project.....	223
Calling Android Methods from JavaScript.....	225
JavaScript Application.....	226
Graphics and Animation.....	231
User Interaction.....	235
JavaScript Summary.....	238
Using Flash and Flex Apps on Android with AIR.....	238
Writing a Flex Application for Android.....	239
Building and Deploying.....	240
Creating the Flex UI with MXML.....	244
Writing ActionScript.....	246
Summary.....	250
•Chapter 7: Using REST with Facebook and Twitter.....	251
Understanding REST.....	252
REST and JSON.....	253
REST from an Android Application.....	255
Asynchronous Tasks.....	258
Twitter.....	259
Examples in Code.....	261
Tweeting on Behalf of the User.....	265
Confirming the User Wants to Tweet.....	266
Understanding the Facebook API.....	268
Facebook and Authentication.....	268
Facebook's Social Graph API.....	272
Summary.....	274
•Chapter 8: Using the Google App Engine with Android.....	275
Introducing Google App Engine.....	276
Getting Started with GAE.....	276
Using Eclipse with GAE.....	278
GAE Project Structure.....	280
Charges for the Google App Engine Service.....	283
Google App Engine Services.....	284
Examining a Sample GAE Application.....	287
Adding the HighScore Service.....	290
Querying the HighScore Service.....	293
Consuming GAE Services with Android.....	297

Exploring the Top Ten Activity.....	300
Viewing the Users of a Game.....	303
Viewing a User's Location (MapView).....	305
Summary.....	310
•Chapter 9: Game Development: Graphics.....	311
Introducing the Android View Package.....	312
Understanding XML Layout.....	312
Layout in Code.....	T.317
Custom Component.....	320
Understanding the Drawable Class.....	328
Drawable Class.....	328
Drawable Subclasses.....	330
NinePatchDrawable.....	334
Direct Rendering.....	336
Summary.....	340
•Chapter 10: Game Development: Animation.....	341
Android Animations.....	341
Creating Views and Animations.....	343
Frame By Frame Animations.....	353
Mixing Views and SurfaceViews.....	359
Summary.....	360
•Chapter 11: App Inventor.....	361
Setting Up App Inventor.....	361
Working with Blocks.....	365
Understanding the Types of Blocks.....	367
Creating Application Logic with the Block Editor.....	376
Limitations of App Inventor.....	383
Limited Set of Components.....	384
Limitations in Block Editor.....	385
Summary.....	386
•Index.....	387
