Table of Contents

Preface

Chapter 1: The Alfresco Platform 7

Alfresco in the Real World 7

Basic Document Management 8

Web Content Management 11

Content Authoring Tools 11

Separation of Presentation from Content 11

Systematic Publication or Deployment 12

Alfresco WCM Example 12

Custom Content-Centric Applications 14

Example Used throughout This Book 16

Alfresco Architecture 18

High-Level Architecture 18

Add-Ons 19

Open Source Components 19

Major Standards and Protocols Supported 21

Customizing Alfresco 22

Basic Customization 22

Dashlets 22

Custom Views 23

Rules and Rule Actions 24

Simple Workflow " 24

Advanced Customization 25

Examples of Advanced Customizations 25

Extend the Content Model 25

Perform Automatic Operations on Content 26

Customize the Web Client 26

Create a RESTful API 26

Streamline Complex Business Processes with Advanced Workflows 27

Get Your Web sites under Control 27

Integrate with Other Systems 27

Dusting Off Your Toolbox **28**
What about Adobe Flex? 29
Understanding Alfresco's Editions **29**
Significant Feature Differences 30
What's Used in This Book 30
Summary **30**
Chapter 2: Getting Started with Alfresco **33**
Obtaining the SDK **34**
Step-by-Step: Building Alfresco from Source 34
Setting up the SDK in Eclipse **35**
Step-by-Step: Importing the SDK into Eclipse 35
Extending Alfresco **37**
Understanding the Extension Mechanism 38
Standard Java Web Application Files 38
Framework Files 39
Packaging and Deploying Customizations **47**
Separating Server-Specific Customizations 48
Step-by-Step: Packaging and Deploying a Simple Customization 49
Taking a Look at the Build File 52
Troubleshooting **52**
Log4j 52
Step-by-Step: Debugging from within Eclipse 53
Node Browser 56
Starting Over **56**
Summary **57**
Chapter 3: Working with Content Models **59**
Defining SomeCo's Content Model **59**
Step-by-Step: Starting the Custom Content Model with Custom Types 60
Types 62
Step-by-Step: Adding Properties to Types 62
Properties and Property Types 64
Constraints 64
Step-by-Step: Relating Types with Associations 65
Associations 66
Step-by-Step: Adding Aspects to the Content Model 67
Aspects 69
Step-by-Step: Finishing up the Model 70
Modeling Summary **71**
Custom Behavior 72
Modeling Best Practices **73**
Out of the Box Models 75

Configuring the UI **76**
Step-by-Step: Adding Properties to the Property Sheet 76
Externalizing Display Labels 79
Making Properties Read-Only 79
Step-by-Step: Adding Types and Aspects to WebClient Dropdowns 80
Step-by-Step: Adding Properties and Types to Advanced Search - 83
Step-by-Step: Setting Externalized Label Values 85
Setting up Additional Locales 86
Working with Content Programmatically **86**
Step-by-Step: Creating Content with JavaScript 86^
Leveraging Root Objects 87
Knowing When to Save Documents 87
Using JavaScript for Batch Manipulation 88
Writing Content to the Content Property 88
Creating Content with Java Web Services 88
Step-by-Step: Run SomeCoDataCreator Class to Create Content 92
Creating Content with PHP Web Services 92
Creating Associations 94
Searching for Content 96
Step-by-Step: Run SomeCoDataQueries Class to See Lucene Example 98
Deleting Content 100
Step-by-Step: Running SomeCoDataCleaner Class to Delete Content 101
Summary **102**

Chapter 4: Handling Content Automatically with Actions, Behaviors. Transformers, and Extractors **103**
Encapsulating Content Operations in Actions **103**
Step-by-Step: Creating a Basic Action 104
Hiding the Action from End Users 109
Creating Actions that Require User-Specified Parameters 109
Step-by-Step: Creating an Action that Accepts Parameters 110
Incorporating Parameter Values in the Action Description 117
Specifying Parameters when Code Executes an Action 117
Binding Logic to Custom Types with Behaviors **117**
Step-by-Step: Writing a Simple Behavior in Java 118
Binding to Multiple Types/Aspects 121
Frequency 121
Figuring Out to Which Policies to Bind 122
Step-by-Step: Writing a Simple Behavior in JavaScript 123
Binding Behavior to Child Types 124
Step-by-Step: Writing a User Ratings Calculator 125
Step-by-Step: Testing the New Rating Behavior 130
Handling Deleted Ratings 132

Extracting Metadata from Files **134**
Customizing Metadata Extractors 134
Step-by-step: Customizing the Metadata Mapping 134
Overriding the Default Mapping 137
Leveraging Out of the box Metadata Extractors 138
Digging into an Extractor Class 138
Step-by-Step: Customizing a Metadata Extractor Class 138
Transforming Content from One Format to Another **140**
Step-by-Step: Writing a Custom Transformer 141
Summary **145**
Chapter 5: Customizing the Web Client User Interface **147**
Knowing When to Customize Alfresco's Web Client and When to Write Your Own **148**
Adding New Menu Items with Ul Actions **149**
Step-by-Step: Adding a Simple Ul Action 149
Showing/Hiding the Label 153
Leveraging Out of the Box Examples 154
Using Other Types of UI Actions 154
Step-by-Step: Adding a Ul Action to Set the Web Flag 155
Restricting the Ul Action by Permission 161
Writing Action Evaluators to Show/Hide Ul Actions **161**
Step-by-Step: Evaluating Whether or Not to Show the Set Web Flag Ul Actions 162
Changing How the Web Client Renders Data with Custom Component Renderers **165**
Step-by-Step: Making a Text Field a Specific Size 166
What Just Happened 170
Overriding the Generator for All Properties 170
Step-by-Step: Changing the Status Field on the Details Page to Display as a Stoplight Indicator 170
Overriding and Customizing Components. 177
Creating Custom Dialogs **178**
Step-by-Step: Creating a Dialog to Execute Scripts 178
Passing the Context to the Dialog 184
Understanding the JSP 184
Enabling and Disabling the OK Button 185
Creating Custom Wizards **186**
Step-by-Step: Stubbing Out the Wizard 187
Step-by-Step: Finishing Out the Wizard 196
Adding Conditions to Wizard Step Pages 209
Receiving Interview Feedback via Email 210

Persisting Interviewer Choices 210
Copying Alfresco's Code into Your Customizations 211
Customizing Web Client JSP Pages 211
Overriding Navigation Rules with Type-specific Settings 211
Summary 213

Chapter 6: Exposing Content through a RESTful API with Web Scripts 215
Introducing the Web Script Framework 216
Step-by-Step: Hello World Web Script 217
What Just Happened? 218
Following the Model-View-Controller Pattern 218
Adding Controller Logic 219
Configuring the Web Script 220
Specifying the HTTP Method 220
Specifying Arguments 221
Specifying the Response Format 222
Deploying Web Scripts 223
Building Solutions with the Web Script Framework 223
Planning the SomeCo Whitepapers and Ratings API 224
Retrieving Data with Web Scripts 225
Step-by-Step: Writing a Web Script to List Whitepapers 226
Debugging 232
Fast Facts 232
Organizing Web Scripts 233
Overriding Web Scripts 233
Choosing a URL 234
Choosing between the Repository and the File System 234
Step-by-Step: Retrieving the Rating for a Whitepaper 235
Specifying Optional Arguments 237
Handling Errors 238
Writing Java-Backed Web Scripts 240
Step-by-Step: Writing a Java-Backed Web Script to Handle Ratings Posts 241
Using the Correct ID for Web Script Beans 247
Using both Java and JavaScript for Controller Logic 247
Wiring a Web Script to Ul Widgets 248
Step-by-Step: Using a Widget to Post Ratings 249
Implementing the Delete Ratings Link 253
Adding the Web Script Calls to SomeCo's Whitepaper Web Page 253
Making Other Types of Content "Rateable" 258
Dealing with the Cross-Domain Scripting Limitation 258

Handling Form Data **259**
Step-by-Step: Implementing a Form-Based Hello World 259
Step-by-Step: Using File Upload in a Multipart Request 261
Customizing the Web Client with Web Scripts **263**
Step-by-Step: Running a Web Script as a Dashlet 263
Understanding Web Script Runtimes 265
Advanced Web Scripts **265**
Running Web Scripts as JSR-168 Portlets 265
Dealing with Web Script Authentication 269
Controlling Web Script Cache 270
Executing Remote Web Scripts 271
Refactoring the Rating Service 272
Summary **276**

Chapter 7: Advanced Workflow **279**
What is a Workflow? **280**
Workflow Options 281
Creating Process Definitions **283**
Step-by-Step: Creating a Hello World Process Definition 283
Organizing Processes 286
Using the jBPM Graphical Process Designer **286**
Step-by-Step: Using jBPM Process Designer to Create and Deploy Processes 287
Tokens 292
Node Types 293
Versioning Process Definitions 293
Deploying Dependencies 294
Using Alternative Deployment Methods 294
Wiring a Process to the Alfresco UI **295**
Step-by-Step: Grabbing the Hello World Argument from the User 296
Understanding Workflow-Specific Content Models 301
Assigning Tasks to Users and Groups **303**
Step-by-Step: Creating the Initial Whitepaper Submission Workflow 304
Controlling What Actions Can Be Taken from the Task Management Dialog 312
Enabling the Workflow Initiator to Select Users and Groups 313
Adding Logic to Workflows with Actions and Process Variables **316**
Storing Data in Process Variables 316
Step-by-Step: Adding Logic to the Whitepaper Submission Workflow 317
Using Java Classes for Decisions 319
Getting Access to the Content in the Workflow 320
Selecting the Right Event for Your Logic 320
Using ForEachFork 320

Using the Workflow API **323**
Step-by-Step: Implementing Third-Party Review 323
Using a Task-Node Instead of a State 333
Making the Third-Party Review More Robust 333
Using Timers **334**
Step-by-Step: Adding a Timer to the Third-Party Review 334
Understanding Timer Syntax 336
Debugging Workflows **337**
Comparing Alfresco Workflow Options **338**
Summary **339**

Chapter 8: Web Content Management **341**
Understanding the Difference between Alfresco DM and Alfresco WCM **342**
Obtaining Alfresco WCM **344**
Step-by-Step: Installing Alfresco WCM 344
Creating Web Projects **345**
Step-by-Step: Creating the SomeCo Web Project 346
What Just Happened 347
Playing Nicely in the Sandbox 348
Inviting Users 349
Mounting Sandboxes via CIFS 350
Virtualization and Layering 351
Creating Web Forms **353**
Step-by-Step: Creating a SomeCo Press Release Web Form 354
Mapping XML Schema Types to Web Form Controls 362
Localizing Web Forms with Labels and Alerts 364
Generating XSD Dynamically 365
Step-by-Step: Creating a Press Release Index Page 367
Making Changes to an Existing Web Form 371
Using Web Forms Outside the WCM User Interface 371
Deploying Content **372**
Step-by-Step: Deploying Content Using the File System Receiver (FSR) 372
Setting the FSR Target User and Password 377
Viewing Deployment Reports 377
Deploying to Test Servers 378
Enabling Deployment Targets for Auto Deploy 379
Step-by-Step: Deploying to an Alfresco System Receiver (ASR) 380
Performing Post-Deployment Processing **381**
Step-by-Step: Running Post-Deployment Code in an FSR Deployment 381
Handling Deletes 382
Step-by-Step: Implementing ASR Deployment Callbacks 383

Modifying and Creating WCM Workflows **385**
Using Launch Dates, Expiration Dates, and Link Checking 386
Launch Dates 387
Expiration Dates 388
Link Checking 389
Step-by-Step: Creating a No-Approval Workflow for Job Postings 390
Working with the AVM API **402**
Step-by-Step: Writing a Web Script to Query AVMNodes 402
Step-by-Step: Writing a Web Script to Trigger Deployments 407
Implementing a Web Script for Submit 417
Using the AVM Console **417**
Summary **418**
Chapter 9: Security **419**
Authenticating and Synchronizing with LDAP **419**
Step-by-Step: Setting Up a Local OpenLDAP Server 420
Step-by-Step: Configuring Alfresco to Authenticate against LDAP 423
Step-by-Step: Configuring Chaining 425
Step-by-Step: Synchronizing LDAP with Alfresco 428
Handling Large Directories 431
Setting Up Single Sign-On (SSO) **431**
Step-by-Step: Implementing SSO 432
Logging Out 437
Step-by-Step: Configuring CAS to Use LDAP for Authentication 438
Working with Security Services **440**
Securing the Admin User 440
Granting Additional Users Admin Rights 440
Step-by-Step: Making tpublisheri an Admin 441
Creating Users and Groups Programmatically 442
Step-by-Step: Creating Users and Groups through the API 444
Understanding Permission Definitions 445
Permission Groups 446
Permissions 447
Permission Sets 448
Step-by-Step: Setting Up A Portal Publisher Custom Role 449
Global Permissions * 454
Mapping Permissions to Methods 454
Summary **455**
Appendix A: API Reference and Examples **457**
Foundation API Public Services 457
ActionService 458
ActivityService (3.0 Labs) 458
AttributeService 458
AuditService 459
AuthenticationService 459

AuthorityService 459
AVM Service 460
AVMLockingService 460
AVMSyncService 460
CategoryService 460
CheckOutCheckInService 461
ConfigurableService 461
ContentUsageService (3.0 Labs) 461
ContentService 461
CopyService 462
CrossRepositoryCopyService 462
DeploymentService 462
DescriptorService 462
DidionaryService 463
EditionService 463
EmailService 463
ExporterService 463
FileFolderService 464
ImporterService 464
LinkValidationService 464
LockService 464
MailService 465
MimetypeService 465
ModuleService 465
MultilingualContentService 465
NamespaceService 466
NodeService 466
OwnableService 466
PermissionService 466
PersonService 467
RegistryService 467
RepoAdminService (3.0 Labs) 467
RepositoryExporterService 468
RuleService 468
SearchService 468
ScriptService 468
SiteService (3.0 Labs) 469
TaggingService (3.0 Labs) 469
TemplateService 469
ThumbnailService (3.0 Labs) - 469
TransactionService 470
VersionService 470
WorkflowService 470
Lucene Queries 470
Basic Lucene Syntax 471
Property Search 472
Proximity Search 472
Range Search 473
Field Search 473

JavaScript 476
Root Objects 477
JavaScript API 478
API Examples 494
Create a Node 495
Perform a Search 495
Persist Content 496
Add an Aspect 496
Set a Property 497
Set Permissions 498
Start a Workflow 498

Appendix B: Alfresco Configuration Reference 501

Actions 501
Actions Available in both Enterprise and Labs 502
Actions Available in Labs Only 504
Web Client Config Elements 505
Conditional Configuration Elements 505
Unconditional Configuration Elements 506
Action Groups 507
Core Web Client Action Groups 507
Forums-Related Ul Action Groups 508
Workflow-Related Action Groups 509
WCM-Related Action Groups 510
Metadata Extractors 510
Transformers 512
Graphical View of the Alfresco Content Model 513
System Model 515
User Model 516
Content Model 517
App Model 518
BPM Model 519
Workflow Model 520
WCM Model 520
WCM App Model 521
WCM Workflow Model 522
