

The Darkroom Handbook

MICHAEL LANGFORD

Photography Consultant
Tim Stephens

EBURY PRESS
London

Contents

Preface	9
Introduction	10

Darkroom equipment

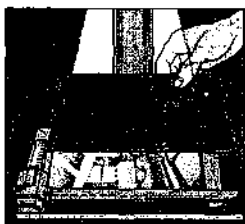

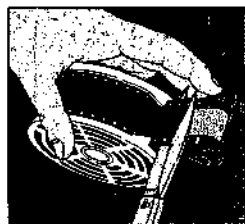

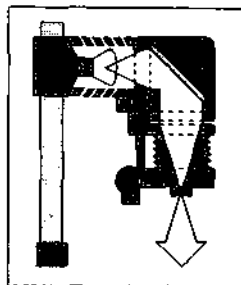

Introduction	34
The enlarger	36
Enlarger designs	38
Enlarger accessories	40
Film processing equipment	42
Black and white print processing equipment	44
Color print processing equipment	45
Basic darkrooms	46
The permanent home darkroom	48
The darkroom complex	50
How black and white films and papers work	52
How color films and papers work	54
The structure of color materials	56
Dye diffusion materials	57
Black and white and color chemicals	58
Black and white papers/darkroom films	60
Color papers/darkroom films	62
Special black and white printing materials	64

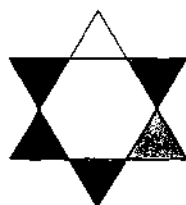

Processing your own film

Introduction	66
Loading the film tank	68
Black and white negative film	70
Assessing black and white negatives	72
Black and white negative errors	74
Pushing/pulling black and white film	76
Grain in negatives	78
Black and white reversal film	79
Accuracy in color processing	80
Color negatives	81
Assessing color negatives	82
Color slides	84
Assessing color slides	86
Pushing/pulling color slide film	87
Storing and mounting	88

Black and white printing

Introduction	90
Making a contact sheet	92
Washing and drying prints	95
Understanding paper grades	96
Making a test strip	98
Making an enlargement	100
Cropping the image	102
Local density and contrast control	104

Objective printing	106
Subjective printing	108
Print finishing	110

Color printing

Introduction	112
Basic principles of light	114
Basic principles of filtering	115
Making a neg/pos contact sheet	116
Making a neg/pos ring-around	119
Simple filtration and exposure aids	120
Making a neg/pos enlargement	121
Making a pos/pos contact sheet	124
Making a pos/pos ring-around	127
Using color analyzers	128
Making a pos/pos enlargement	129
Making a dye diffusion print	132
Additive printing	133
Local color control	135
Print finishing	136

Basic manipulations

Introduction	138
Black and white slides and negs from color	140
Color prints from black and white	142
Black and white prints from color slides	144
Conversion to line	146
Using grain	148
Vignetting and combination printing	152
Registration	156
Half-tone screens	158
Prescreened film	163
Tone-line	164
Uneven development	166
Intensification	168
Negative reduction	170
Print reduction	172
Using liquid emulsion	175
Processing distortions	178
Copying	180

Advanced manipulations

Introduction	182
Photograms	184
Using lith emulsions	196
Line separations color printed	200
Shape changes and image distortion	204
Diffusers and texture screens	208
Using equidensity film	212
Bas-relief	216
Highlight masking	218
Shadow masking	221
Multiple printing	224
Sandwich printing	232
Solarization	236
Posterization	244

Dye transfer	252
Pointillism effects	257
Photo silkscreening	260

Workroom techniques

Introduction	266
Toning	268
Black and white drawings	276
Hand coloring negatives	278
Hand coloring prints	280
Airbrushing	284
Montage	288
Hand embroidery	293
Photo etching	295
Photo lithography	297
Manipulating print emulsion	299
Manipulating instant pictures	302
Photocopy derivations	307
3D images	312
Color Key film	313

Rediscovering old processes

Introduction	316
Gum bichromate	318
Van Dyke brown	323
Milk prints	325
Cyanotype	327
Kallitype	329

Appendix	332
Glossary	338
Index	347
Acknowledgments	352
